

IRETIOLUWA OGUNMOLA

PRODUCT MANAGER | ZERO TO ONE DIGITAL PRODUCTS | AI AND TECHNICAL PRODUCTS

Abuja, Nigeria | +234 814 423 5808 | ogunmolaireti5@gmail.com | LinkedIn: Iretioluwa Ogunmola

PROFESSIONAL SUMMARY

Product Manager with more than three years of combined product ownership and product management experience, supported by over five years of customer-facing work. Led PropertyBridge from early research and product definition through pricing, technical requirements, delivery, testing, launch, and early improvement. Experienced in customer research, roadmap management, PRDs and FRDs, feature prioritisation, product testing, go-to-market planning, and collaboration with engineering, design, marketing, and business teams.

KEY SKILLS

Product strategy and vision | Product discovery and user research | Roadmap management | Feature prioritisation | Agile and Scrum delivery | PRDs and FRDs | User stories and acceptance criteria | API and backend workflow requirements | Alpha and beta testing | Product analytics | Pricing and subscription models | Go-to-market planning | Competitive research | Stakeholder management | Cross-functional leadership | Customer onboarding and feedback

WORK EXPERIENCE

Product Management Lead | True Horizon Tech, Abuja

February 2026 to Present

- Took PropertyBridge from zero to its first paying customers, generating ₦412,500 in combined revenue across the pilot's first two months and narrowing net operating loss 21% month-on-month in the second month.
- Delivered product demos to 11 of a 12-user pilot target across three customer segments (property managers, lawyers, facility managers), converting the platform's first paying customers, including one ₦300,000 deal closed directly off a demo.
- Drove 138% growth in site sessions and 230% growth in new users within six weeks of launch, while catching and correcting a data-quality issue that had inflated active-user figures by roughly 25%.
- Cut operating expenses 14% month-on-month while scaling onboarding activity, through tighter spend discipline across vendors and tooling.
- Identified informal property managers and self-managing landlords as an underserved segment through customer, market, and competitor research redefining the initial target market before build.

Technical Product Management Lead Volunteer | Mikaelson Community Development and Tech Initiative, Nigeria

September 2025 to Present

- Defined RIO's product vision, user groups, core journeys, roadmap, and backlog from a blank slate, coordinating a cross-functional team of approximately 12 contributors across frontend, backend, Flutter, design, and automation.
- Led the end-to-end relaunch of the Mikaelson Initiative website, rewriting all content and directing information architecture in Figma with a designer; shipped and live.

Associate Product Manager | BorderlessHR, Remote

June 2025 to August 2025

- Introduced prototype-first validation into the product workflow, using vibecoding tools (Lovable and Bolt AI) to pressure-test proposed onboarding flows with stakeholders before engineering investment, a practice the team hadn't used before.
- Used surveys and customer feedback to identify onboarding friction, translating findings into simplified flows and clearer value messaging for the NulFootprint redesign.

Product Owner and Customer Experience Lead | Chayim Diagnostic Limited Services, Abuja

March 2023 to February 2026

- Built the company's first structured SOPs, complaint-resolution process, and escalation framework from scratch, cutting recurring monthly complaints from 10+ to near zero (0–1) across a base of 2,500+ active users.
- Translated recurring client complaints and workflow failures directly into the requirements for the company's 2023 website launch, turning support-desk patterns into shipped product decisions.

Customer Service Executive | Firmcare Diagnostics and Medical Services, Abuja

August 2021 to March 2023

- Resolved customer issues across digital and operational workflows and escalated recurring problems with clear evidence and context.
- Improved customer follow-up through proactive communication and structured issue tracking.

SELECTED PRODUCT CASE STUDIES

PropertyBridge | 2026 Led discovery, strategy, pricing, requirements, delivery, testing, launch, onboarding, and early analytics for a live property-operations platform.

RIO | 2026 Defined an AI-enabled progress and habit product, including the PRD, roadmap, backlog, onboarding, AI feature requirements, and technical delivery decisions. Product remains in development.

NovaLend | 2026 Analysed a digital-lending beta funnel, assessed credit risk against target, completed RICE prioritisation, and wrote PRDs and a launch decision pack for two priority features.

Nul Footprint | 2025 Contributed research, requirements, MVP planning, competitor analysis, market sizing, and a product-revamp roadmap for a carbon-tracking platform.

Mikaelson Initiative Website | 2025 Reworked the website structure, tone, messaging, content, and design direction; collaborated with a designer using Google Docs and Figma. Live product.

TravelMet | 2025 Contributed to the PRD and created low- and high-fidelity wireframes for the AI language-translator feature of an AI travel companion concept.

Africa Agility FarmFoodHub | 2025 Supported research, product definition, personas, requirements, and MVP prioritisation for a platform connecting farmers, consumers, and food banks. Live prototype.

AfriBite | 2024 Supported research and product definition for an African food discovery and ordering platform; produced personas, PRD inputs, and a prioritised MVP.

Chayim Diagnostic Website | 2023 Translated customer and operational needs into website requirements, coordinated delivery, reviewed usability, and supported launch.

Product Teardowns

Claude AI | 2026 Served as Technical Supervisor, analysed survey findings, recommended missing features, completed RICE prioritisation, and developed an implementation roadmap.

Canva | 2025 Contributed user personas, user flows, analysis, and final presentation slides to a team product teardown.

Uber vs Bolt | 2025 Completed an individual comparison of product positioning, user needs, features, pricing, safety, localisation, and competitive strategy.

LetsChat | 2024 Investigated the shutdown of ByteDance's Africa-focused messaging app and proposed a product roadmap covering stability, trust and safety, differentiation, and monetisation.

TOOLS

Jira | Trello | Figma | FigJam | Canva | Microsoft 360 | Google Analytics | Google Workspace | Microsoft Clarity | Google Cloud | AI and API integrations | Slack | Zoho | OpenCode | Cursor | Antigravity | VSCode | Github | Netlify | Vercel | Sanity | Claude AI | ChatGPT | Docker |
